Projects (All Hosted on Heroku)

PHOTO APP (GITHUB LINK)

- Built a Ruby on Rails web application where users can purchase lifetime access (via Stripe) to upload and store photos to access from any location via the S3 Buckets storage service through Amazon Web Services (AWS), all secured with Devise and SendGrid for confirmation

FINANCE TRACKER (GITHUB LINK)

- Ruby on Rails web application where users can add stocks to their portfolio to track in real time via AJAX, including comprehensive pages for each stock all powered via the IEX Cloud sandbox API, secured with Devise

MESSAGE ME (GITHUB LINK)

- Created a simple Ruby on Rails web application for sending messages from one user to another in a chatroom in real time via ActionCable, AJAX, and Redis and secured with Devise

ALPHA BLOG (GITHUB LINK)

- Built a Ruby on Rails blog application that allows users to make an account to post blogs, link them to multiple categories, and search for other blogs or users via a universal search feature using the Ransack gem

Work Experience

TECHNICAL SUPPPORT ENGINEER – POWERSCHOOL (MAR 2022 – PRESENT)

- Accurate/efficient diagnosis, troubleshooting, and resolution of detailed application system functionality issues
- Updating/implementation of programs for local/state-level base, enterprise, and strategic school system clients
- Troubleshooting of SQL server stored procedures, functions, views, and triggers via implementation of SQL scripts
- Detailed manipulation of HTML, CSS, and JavaScript elements in client UI configurations
